1. June Is Waste Reduction Month

Inquiry: Environment division at (83)1610

In 2022, 23,500t of burnable waste was collected at the incineration plant, and the amount decreased approximately 90t compared to the previous year. Let's be aware of the following for further waste reduction.

■ Reducing food waste.

- Let's check food inventory before shopping and buy only what you need.
- Make sure to understand of food expiration and consumption.
 - ※ Food expiration: Displayed on products that can be stored for a long time. Even if the expiration date has passed, it does not mean it cannot be eaten immediately. Individual judgement is required based on appearance and smell etc.
 - ※ Consumption expiration: Displayed on products that can go bad soon. Not safe to eat once consumption expiration has passed.

■ Let's separate recyclables.

- Cardboard, newspapers, magazines and etc. are separated and tied up with paper strings, and brought to a local collection site.
- Fluorescent tubes, pet bottles, food trays, old clothes/ cloths, and Styrofoam can be brought to a public facility collection station. Only plastic bottles are collected at local collection sites.

■ Let's try to reduce the moisture of your kitchen waste.

- Try to drain water before throwing it away.
- Use a garbage disposal unit and use your kitchen waste as fertilizer.
- Try composting your waste at home or in the city. (Organized by the part of Niihashi district, Yuzawa district, the part of Hagiwara district, and Morinokoshi district)

■ Think about what you can reuse.

Please take out your garbage to collection sites by 8:30am.
